

# **RADICAL CLUBSPORT FOR SALE**

This car has been competed successfully for the last two years in the ASWMC Hillclimb and Sprint Championship achieving many class awards. Previous to this it has competed successfully in the Castle Combe GT Challenge, again achieving second in class in the championship and many class awards.

The car is eligible for many race series including Radical UK and Club Cup Series, 750 MC Bike Sports Championship, and many special GT championships. Equally it is highly competitive in the Sports Libre Class at Hillclimbs and Sprints or can be used as a highly effective track day car. It has a current RAC Logbook for Hillclimbing and Sprinting.

To the best of our knowledge this car has never been involved in any accidents and the chassis has not been repaired or modified. It has been maintained to a high standard throughout its life, and the overall condition reflects this. It is reluctantly being sold to enable progression to be made to a Hayabusa powered machine.
